

***Anything Is Possible
Providing You Work As A Team***

The Provide® Abutment

- *Providing Superior Surgical And Restorative Flexibility To Better Serve Patients*
- *A Strategic Tool For Practice Growth*
- *Snap-On Impression Components For Ease Of Use*
- *Certain® QuickSeat® Connection Produces An Audible And Tactile Click Confirming Proper Seating*
- *Kit Packaging For Streamlined Case Processing*

Optimal Patient Care Starts With A Strong Product

With the increasing demands for dental implant therapy, the Provide® Abutment offers both surgical and restorative clinicians more options and greater flexibility to meet these demands and better serve patients. It allows them to partner together for a simpler restorative and surgical experience.

The implant is placed at bone level and not transgingivally, therefore the final crown margin is part of the abutment, not part of the implant. Provide Abutments give clinicians four collar height options for unmatched flexibility. This means the final crown margin is determined by restorative indication, not surgical consequence.

Providing Surgical Flexibility

- **No Need To Determine Final Crown Margin At The Time Of Surgery**
- **Multiple Collar Heights (1, 2, 3 and 4mm)**
- **No Need To Prepare Implant Collar Due To Tissue Recession**
- **Use In A One Or Two-Stage Surgical Protocol**
- **Opportunity For Platform Switching™ To Potentially Preserve Crestal Bone**

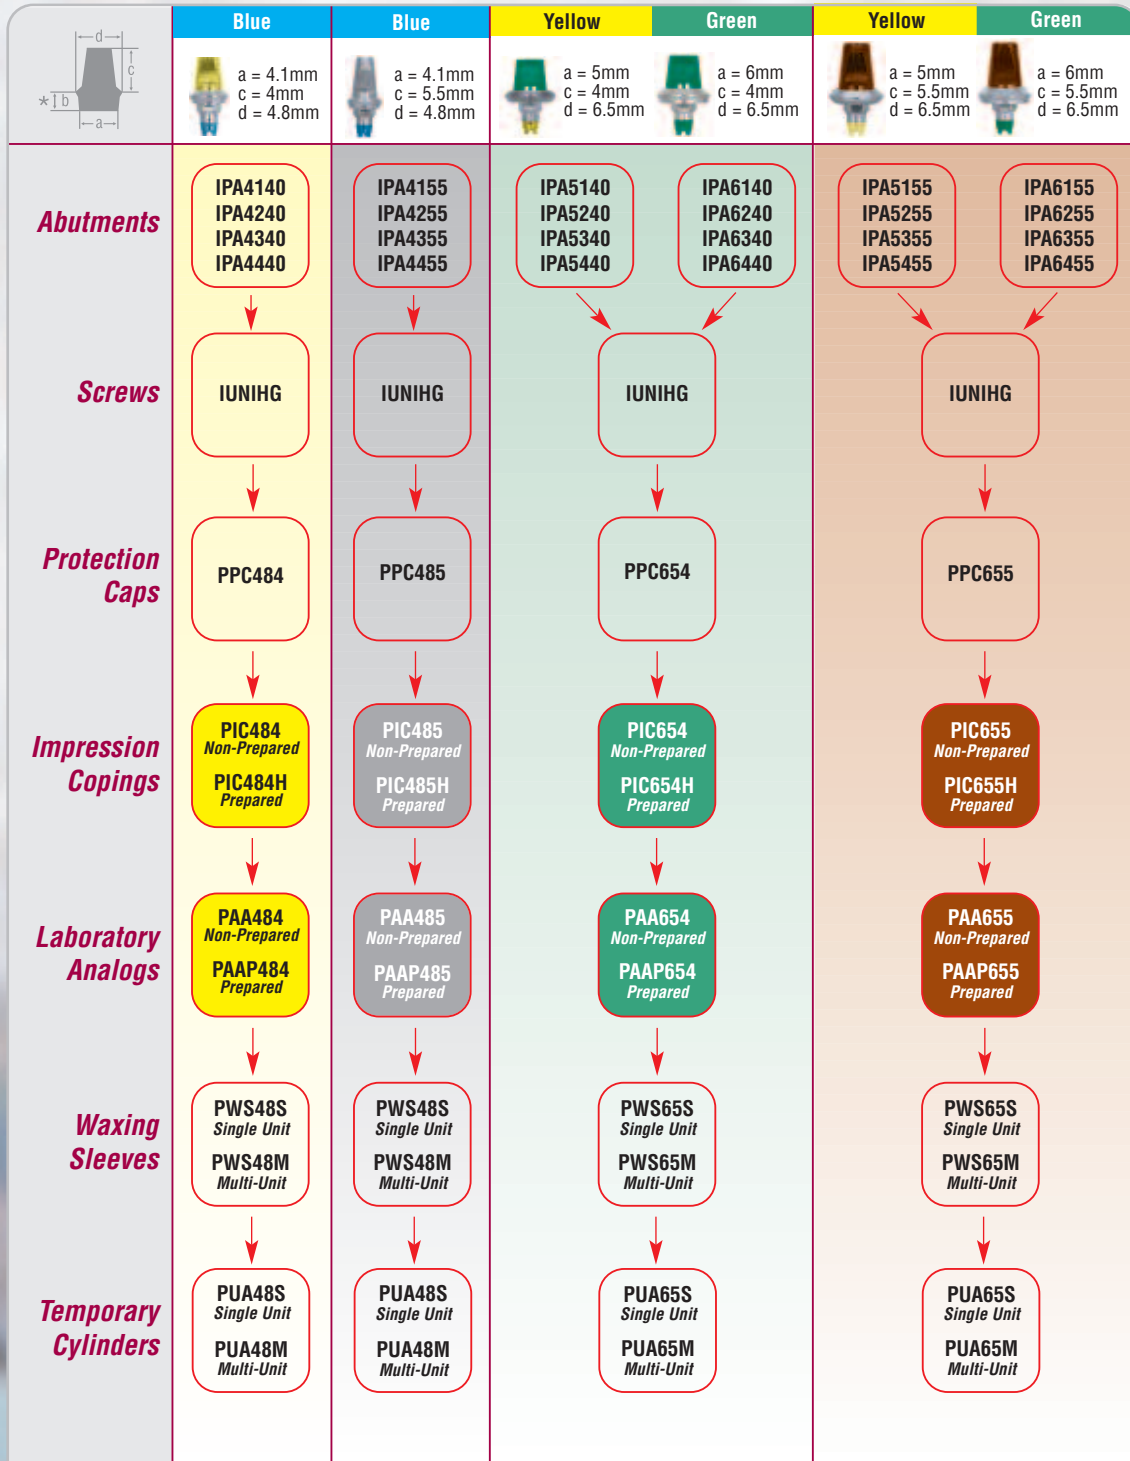

Achieve Your Practice Growth Goals Faster

A change of strategy could put you in the winner's circle. When clinicians want to reach their practice growth goals, using the Provide Abutment can be ideal. The simple restorative protocol is often easier than traditional crown and bridge procedures, which may allow for more implant referrals and greater adoption of the implant option.

Because restorative results and component costs are more predictable, you may achieve your practice growth goals more consistently. The Provide Abutment simplifies implant dentistry and may allow for more predictable growth of that segment of your practice.

Start To Finish, BIOMET 3i Helps Restorations Stay On Track

Provide® Component Selection Flowchart

* b: collar height selection depends on tissue depth

* Abutment Placement Kit includes the Provide Abutment, Protection Cap and Abutment Screw.

** Abutment Restorative Kit includes the Provide Impression Coping (non-prepared), Provide Impression Coping w/Holes (Prepared), Provide Waxing Sleeve (single unit and multi-unit) and Provide Abutment Analog (non-prepared) - The Provide Abutment Analog w/Pin (prepared) is NOT included.

Please Note: Provide Impression and Restorative Components are not compatible with the Straumann-ITI® Implant System.

Restorations Are Simpler When You Have The Right Product

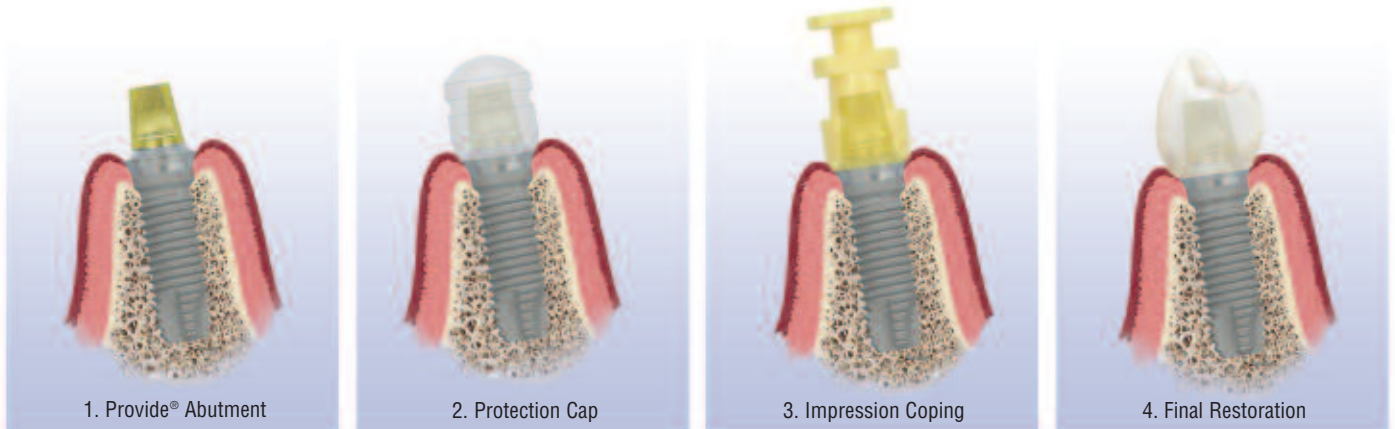

When you want quicker and easier implant restorations, you need the right product. The Provide® Abutment provides dental implant clinicians with easily identifiable, color-coded compatible components. Provide Abutments feature the Certain® QuickSeat® Connection, with its audible and tactile “click” for verification that the abutment is correctly seated. The Provide Abutment’s snap-on impression components eliminate the need for an implant-level impression or titanium preparation. There is no need to pack cord, truly making the restorative procedure challenge the simplicity of traditional crown and bridge dentistry.

Providing Restorative Flexibility

- ***Snap-On Impression Components***
- ***No Implant-Level Impression***
- ***Variety Of Provisionalization Options
(Provide Temporary Cylinder,
Provide Protection Cap)***
- ***Certain QuickSeat Connection***
- ***Color-Coded Platform, Post And
Interfacing Components***
- ***Two Post Heights (4, 5.5mm)***
